

Equipois Adds Azairis as Distributor in France

LOS ANGELES (October 24, 2012) – [Equipois, LLC](#), pioneer of zeroG® and X-Ar™ exoskeletal arm technologies, has partnered with [Azairis](#) to distribute Equipois products in France.

Located in Saint-Nazaire in western France, Azairis is a provider of innovative industrial solutions related to workstations and tools. Its expertise includes design and implementation of products and processes. Azairis's customers include top companies in the aerospace, automotive, luxury manufacturing, and other industries.

Equipois's patented zeroG® and X-Ar™ solutions allow workers to maneuver tools and other objects as if weightless, but with total freedom of motion, greatly increasing productivity and eliminating workplace injuries. Its products have been successfully implemented for operations such as riveting, drilling, fastening and grinding in [aerospace and defense](#), [automotive manufacturing](#), [heavy machinery](#), [shipbuilding and maintenance](#), [metal fabrication](#), and other industries.

ABOUT EQUIPOIS, LLC

Equipois designs and manufactures exoskeletal technologies that support the musculoskeletal system while allowing full spatial and rotational freedom of motion. The company's patented zeroG® and X-Ar™ systems are designed to support a range of manufacturing, heavy industrial, defense and other applications in order to increase productivity and safety. Equipois received the Wall Street Journal's Technology Innovation Award in 2011. Equipois, LLC is a wholly owned division of [Granite State Manufacturing](#), an Allard Nazarian Group company.
